Font License and Usage Information

All the fonts used in the Blueball User's Choice FontStylr stacks are open source or free fonts. We have researched each font license to make sure they allowed font-embedding before including them. Because of this attention to detail, we had to drop many of the user nominated font styles that were submitted to us which did not allow font embedding.

Important - Please Note! Although you are free to use the font styles included with the FontStylr stacks bundle on your Rapidweaver site pages as much as you want to, the individual font styles and names remain the exclusive copyright property of the font developer and their information is included in each of the cufon generated font javascript files.

Good luck with your web site!

Best,
Charlie Lockhart
